Communication between us and our clients is fundamental aspect of our business. We believe that effective communications in a timely manner provides the platform on which a solid partnership is developed. Our principle form of communication is the 'Catalonia Tours Tour Programme'. The Tour Programme details the tour itinerary, site survey reports (if requested), timetables and tour description. Preplanning is considered as another important aspect of our business management. We believe that each tour should be meticulously planned and every aspect of the tour clearly stated on the Tour Programme. Our Tour Managers work hard to ensure that little is left to chance.
